来实 KL 板是最理想的屋面钢板。41mm 高的窄肋不仅加强了钢板的强度，而且具有美观及排水性极佳的特性。来实 KL 板的最小建议屋面坡度为 2°(1/30 或 3%)。如果条件许可，来实 KL 板可用于坡度低至 1° 的屋面。独特的 KL65 固定座的隐藏式安装系统，使钢板表面没有螺钉穿透。

来实 KL 板由 BHP 预涂覆洁面镀锌钢板或本色镀锌高强钢板滚压而成，其基钢的最小屈服强度为 550MPa，材质符合澳大利亚 AS1397-G550-AZ150 标准，高强度的基钢增加了钢板的跨度，同时减少了支撑檩条的使用数量。

在满足运输条件的情况下，来实 KL 板的长度一般可以根据项目需求生产，对大型项目亦可提供现场压制。

L YSAGHT KLIP-LOK® is our premium roofing profile. Its 41mm high, but slim ribs provide strength, beauty and maximum rainfall intensity carrying capacity. LYSAGHT KLIP-LOK® is recommended down to a minimum roof pitch of 2° (1 in 30 or 3%). If the purlins and the roof plane are perfectly aligned LYSAGHT KLIP-LOK® can be used for roof slopes as low as 1°. The original KL65 concealed clip installation system, means that no fasteners penetrate the profile.

LYSAGHT KLIP-LOK® is manufactured from BHP's Clean Colorbond® (pre-painted) and Zincalume® (unpainted) steels. The minimum yield strength of the base steel is 550MPa and confirms to Australian Standard AS1397-G550-AZ150. This high tensile steel base gives added spanning ability to the profile, thus reducing the number of purlin supports required.

LYSAGHT KLIP-LOK® is produced to our customers' project length requirements, restricted only by transport limitations. For large projects we have mobile equipment which can produce longer lengths at site.

技术数据 Specifications

安装 INSTALLATION

来实 KL 板通过 KL65 专用隐藏式固定座与檩条固定。固定座与螺钉作为 BHP 建筑用品屋面系统的一部分与泛水、收边板及其他零配件等一起配套提供。隐藏式固定方法请参见下图。

LYSAGHT KLIP-LOK® is installed using patented KL65 clips which are secured to purlin supports by self-drilling fasteners. Both clips and fasteners form part of the BHP Steel Building Products roofing supply package together with compatible flashings, trims and other accessories. The accompanying sketch illustrates our concealed fastener concept.

* 来实 KL 板采用 BHP 洁面彩色镀铝锌钢板或本色镀铝锌钢板滚压而成。
LYSAGHT KLIP-LOK® is always produced from BHP Clean Colorbond® or Zincalume® (unpainted) steels.

来实 PR板是一种独特的以隐藏方式固定的钢板，可用作室内、外墙面板、吊顶、招牌及围栏等。与传统波纹板及单调的平板相比，来实PR板能产生不同风格的立面效果，给客户提供更多的选择。用聚苯或聚氯酯板衬于来实PR板后，既可起到保温隔热作用，又可增加板的刚度，使整体立面平整度更好。来实PR板有多种宽度供客户选择，详情请查询。

11

LYSAGHT PRESTIGE® PANEL is a distinctive concealed-fastener cladding for exterior & interior walls, ceilings, soffits, fascias and parapets. The use of LYSAGHT PRESTIGE® adds a material selection choice between those of ribbed and completely flat wide panels. Insulation can be achieved by applying PU or PS boards to the back of the panels. This also makes the panels flatter and stronger. Additional widths are available to that shown, on enquiry. Also enquire about maximum sheet length availability.

来 实 高 强 镀 锌 檩 条

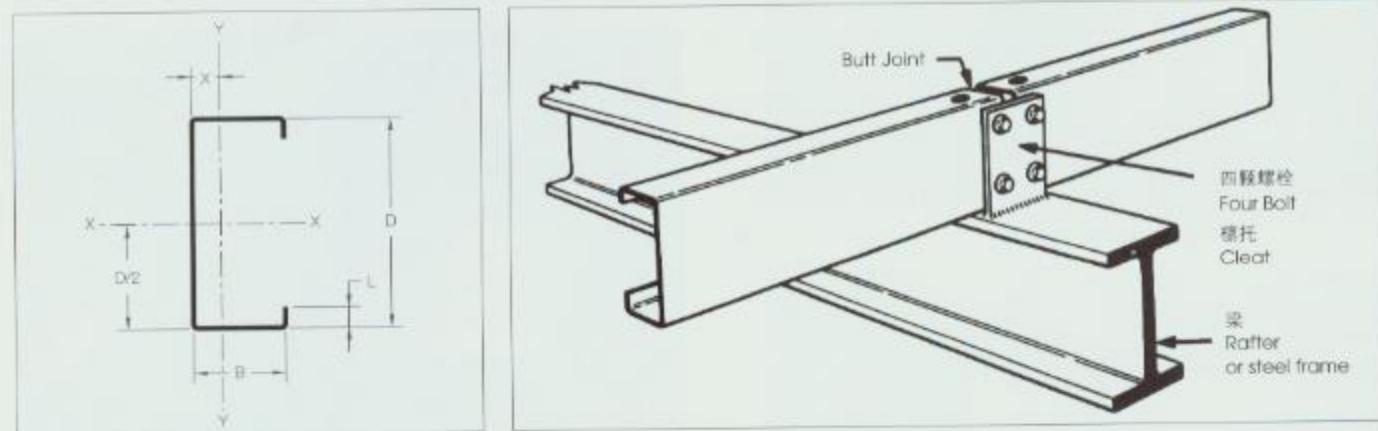

来实高强镀锌檩条的两翼等宽，适用于各种结构的建筑用途。来实Z型檩条为宽窄翼缘设计，当一根Z型檩条180°翻转时，其宽翼可与另一根同样型号Z型檩条的窄翼通过螺栓固定搭接，这样形成的连续檩不仅可节约材料，而且在弯曲瞬间及剪切力达到极限时，搭接部分固定于钢构件上，其两层檩条翼缘可增强该部分的强度，从而改善整个系统的荷载能力及稳固性。

来实镀锌檩条的安全荷载表是BHP在理论数据基础上，通过与悉尼大学合作，采用其澳洲唯一、世界最大的真空实验设备经过无数次试验得出的。来实高强镀锌檩条是值得客户信赖的产品。

在满足运输条件的情况下，来实C型和Z型檩条的长度一般可以根据项目需求生产，并可按设计在工厂预先打孔。我们配套提供撑杆、拉杆及镀锌螺栓、螺帽、垫圈等。檩条型号参见下表。

L YSAGHT C and Z purlins are roll formed to customers' length requirements and hole-punched to your detail. They are available as a complete package together with bridging pieces, tie rods and galvanised bolt, nut and washer sets. The broad range of sizes is shown below.

C 型 檩 条 C Purlin

* 回转半径 Radius of Gyration: $r = \sqrt{I/A}$

* 截面模量 Section Modulus: $Z = I/s$ (s —截面量外侧纤维分别至相应 x 轴或 y 轴的距离 distance to the extreme fibre of the respective axis.)

A feature of our Z purlin range is one broad and one narrow flange, proportioned so that two sections of the same size, when one is rotated 180°, bolt snugly together, making them suitable for lapping. Structural continuity results in better economy, but lapping provides two thicknesses of material over interior supports, increasing the strength of the sections where bending moments and shears are maximum, improving the load capacity and rigidity of the system.

Our C purlins have equally sized flanges and are suitable in situations where the spans are simply supported and for shorter spans they may be used continuously over two or more spans with the ends butted. This continuity results in reduced deflections compared to simple spans. Symmetrical C purlins are also good for other construction application, such as, rafters, joists, posts and trunking sections.

Our safe load tables are derived from theoretical engineering practice and enhanced by research in conjunction with the University of Sydney, utilising their vacuum test rig, which is the only one of its type in Australia and the largest in the world. You can depend on LYSAGHT Hi-Ten® purlins.

材 质 MATERIAL

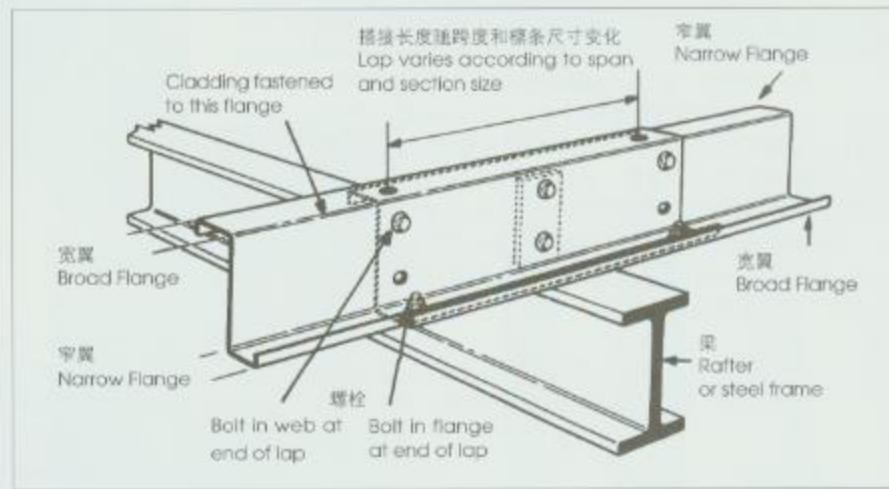

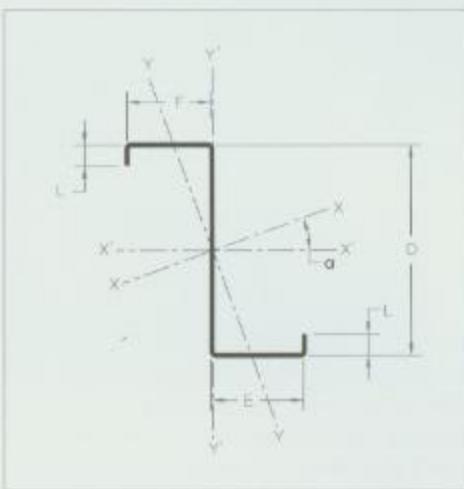

来实标条采用BHP生产的冷轧高强热浸镀锌钢板，双面镀锌量为275g/m²，最小屈服强度450MPa，材质符合澳大利亚AS1397—G450-Z275标准。

来实高强镀锌檩条在室内使用终生无需维护。

LYSAGHT® purlins are always produced from BHP galvanised steel to Australian Standard AS1397-G450-Z275; signifying a minimum yield strength of 450MPa and zinc coating of 275g/m².

Pre-galvanised purlins will mean nil maintenance in most internal applications.

在钢结构工程中，来实 W 型结构楼承板承载现浇的混凝土楼板是一种省时经济的方法。

来实 W 型结构楼承板既可替代混凝土楼板底部受拉筋的使用，又可起到施工时模板的作用。经滚压成型并具有专利的表面压纹使压型钢板与混凝土之间产生最大的机械结合力。同时配以来实 W 型楼承板加劲肋，进一步增加了压型钢板在组合楼板体系中的承载作用。在组合楼板设计中，来实 W 型楼承板既在使用阶段代替了受拉筋的作用，又在施工阶段起到了模板的作用，这样在同样满足设计要求的情况下节省了钢筋和混凝土的用量。高强度的来实 W 型结构楼承板施工快速简捷，能够在短时间内提供坚实的工作平台，在浇筑混凝土后更省去了拆模的麻烦。来实 W 型结构楼承板基本可以做到无需临时支撑，与传统钢模板或木模板相比，降低了综合造价，也给工地提供了便利的通道及安全干净的施工平面。

来实 W 型结构楼承板有两种板型，各有四种厚度，足以供设计者结合不同建筑的荷载、跨度要求选择最经济适用的板型。

来实 W 型结构楼承板符合美国 UL 耐火极限认证及 ICBO 标准，并已通过中国公安部天津消防科研所国家固定灭火系统和耐火构件质量检测中心的耐火极限检测，作组合楼承板时无需防火喷涂，大大降低工程造价。

LYSAGHT W structural floor decking® is the time-saving way of constructing suspended concrete floor slabs in steel construction.

LYSAGHT W DECK® can be used as lost formwork or as a composite floor system. The patent embossments, rolled into the profile create the highest bond between concrete and the deck and together with the smaller ribs and flutes enhance our product's composite action and rigidity. Used in composite design, LYSAGHT W DECK®, performs as positive reinforcement as well as permanent formwork, thus providing savings in concrete and reinforcing steel. The fast and simple installation of this high strength product, gives immediate access to a working platform and requires no stripping after concrete curing. Coupled with nil or far less propping compared to strippable formwork, LYSAGHT W DECK® saves considerable construction time which translates to savings in overall construction costs, site accessibility for following trades and site safety.

The availability of 2 profiles in 4 thicknesses enables designers to select the most efficient combination to suit their load and span requirements.

LYSAGHT W DECK® is designed and manufactured to pass USA UL fire rating and ICBO requirements. LYSAGHT W DECK® has also passed the fire rating test at the China Quality Supervision and Test Centre for fixed fire extinguishing systems and fire resisting building components. No sprayed fire treatments are required to the underside of our decking when designed as composite construction which generates additional savings in construction costs.

材 质 MATERIAL

来实 W 型结构楼承板采用 BHP 镀锌钢板滚压而成，材质符合澳大利亚 AS1397-G300-Z275 标准（最小屈服强度为 300MPa，双面耐腐蚀热浸镀锌量不小于 275g/m²），符合美国 ASTM A525 G90(1986) 标准，超过 ASTM A446 Grade C 标准。若采用 ASTM 于 1994 年颁布的关于镀锌钢板的材质标准，BHP 镀锌钢板则符合或超过 ASTM A653 SQ Grade 40 (275) G90 标准。

LYSAGHT W DECK® is produced from BHP's ZINCFORM® steel, produced to Australian Standard AS 1397-G300-Z275. (300 MPa minimum yield strength and 275g/m² minimum of corrosion inhibiting hot dip zinc coating) This also meets the specification of ASTM A525 G90 (1986) and surpasses ASTM A446 Grade C. According to new material specifications issued by ASTM in 1994 for galvanised (zinc coated steels), BHP's Zincform®, to the above specification, meets or surpasses ASTM A653 SQ Grade 40 (275) G90.

我们希望本产品手册所展示的优质、耐久的建筑钢品已为广大客户提供过了最佳的选择方案。BHP 建筑钢品公司历来重视产品的研究、开发和试验，以确保产品达到各项要求。正因为如此，公司才能以其诚实、严谨赢得广大客户的信赖，在建筑钢品市场始终处于领先地位，来实钢品也正如我们所承诺的，在中国成为物超所值的优质建筑产品。

所有来实钢品在推出使用前，均需经过严格的实验。压型钢板属超薄壁型钢，其受力性能不宜以理论推算，而必须以实验获得。来实系列屋、墙、楼面钢板的所有荷载表均由实验得出，使产品的使用性能得到充分保障。

BHP 建筑钢品公司生产的各种来实品牌的屋、墙面及楼面压型钢板在亚洲及澳洲市场上的年销量已超过千万平米。上百年来，来实钢品一直被尊为建筑钢品的上乘之作。

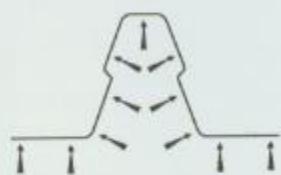

We hope you have found that this catalogue of high quality, long lasting steel building products has provided a solution for your project. Our tradition of market leadership through research and testing gives you the assurance that you are using products from a company of integrity. By doing what we say we and our products will do, we illustrate why the LYSAGHT® range of steel building products are the best value for money in China.

All products are fully tested before being released to the market as the accompanying photographs show. Roll-formed steel profiles are produced from thin steels and therefore load capacities should not be extrapolated from other thicknesses or shapes. All of our load tables and data have been prepared using actual test data thus giving assurance of performance.

BHP Steel Building Products produce and supply approximately 10 million m² of roof, wall and floor decking per annum throughout Asia and Australia. All LYSAGHT® brand profiles - over a century of recognition.

公司概况 COMPANY PROFILE

BHP公司(全称Broken Hill Proprietary Company Limited)是一家创立于1885年，总部设在澳大利亚的大型跨国公司，主要经营矿业、钢铁及石油三大业务。BHP公司是世界财富500强公司之一，在全世界50多个国家和地区拥有50,000名员工，总资产超过210亿美元，年营业额超过140亿美元。今天，BHP股票在世界主要证券市场上市，在全球拥有30多万名股东。

BHP钢铁公司是板材产品的专家，是国际公认先进钢铁镀层及涂覆技术的领导者。

BHP建筑钢品公司隶属BHP钢铁公司，为澳大利亚及亚洲建筑市场提供优质压型钢板及配套产品。公司前身系1857年成立于澳大利亚的来实钢品公司。140多年生产和销售压型钢板的经验，使BHP建筑钢品公司发展成为当今世界上最大的压型钢板生产商。早期BHP建筑钢品公司通过其在澳大利亚的生产基地向亚洲出口来实钢品，如今仅亚洲就在9个国家经营着17家压型板工厂。公司经营的来实品牌一直代表着建筑钢品的最高标准，来实钢品因其卓越不凡的品质，在国际市场上享有盛誉，得到了建筑师、工程师和建筑商的一致推崇。

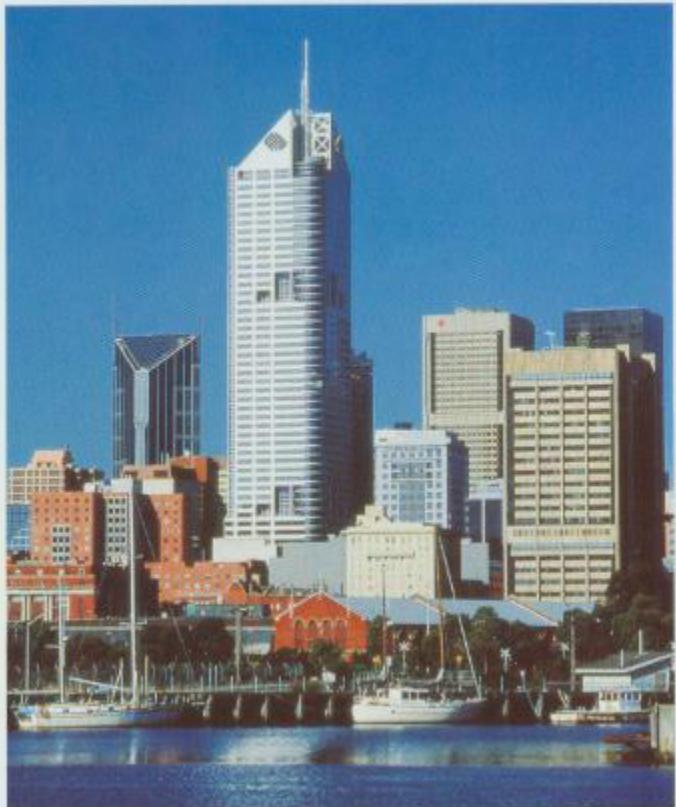

在中国，BHP建筑钢品公司先后于1994年和1995年在上海和广州投资设立了两家压型钢板工厂，分别向北中国和南中国地区提供来实钢品。BHP建筑钢品公司通过其遍布全国的销售和技术网络，为客户提供优质的产品和服务。我们已为中国九百多个项目提供了超过九百万平方米的优质屋、墙面及楼面压型钢板。上海和广州工厂均已通过ISO 9002质量认证，我们能证明我们能做得更好。在中国生产的来实钢品拥有BHP建筑钢品在世界其它地方生产的来实钢品一致的品质标准，所有来实钢品始终采用BHP自产的值得信赖的涂覆钢板，如洁面彩色镀锌(Clean Colorbond®)、镀铝锌(Zincalume®)及高强度镀锌钢板等，以满足客户的各种需求。

我们期待着为客户提供最佳的方案和服务。

BHP(The Broken Hill Proprietary Company Limited) is an Australian based global company founded in 1885. BHP's core businesses are Minerals, Steel and Petroleum. The company employs 50,000 people in more than 50 countries. As one of the Fortune 500 companies in the world, BHP has total assets of US\$ 21 billion and operating revenues of US\$ 14 billion. Today, it is listed on major stock exchanges and has more than 300,000 shareholders, worldwide.

BHP STEEL is a specialist in flat products and is regarded as a world leader in the metallic and organic coating of steel.

BHP STEEL BUILDING PRODUCTS is a downstream group of companies,

roll-forming cladding and associated building products for the Australian and Asian construction markets. This group of businesses was formerly known as JOHN LYSAGHT which was established in Australia in 1857. With this over 140 years of experience, BHP Steel Building Products has grown to become the largest coated steel profiler in the world. From its Australian base, BHP Steel Building Products, were early in exporting LYSAGHT® products to Asia. Now the company produces the products at 17 manufacturing centres in 9 Asian countries. The LYSAGHT® brand has always meant a supreme standard of quality in steel building products with no equivalent. That is why the name LYSAGHT®, is highly respected by generations of builders, architects and engineers, internationally.

In China, BHP Steel Building Products have established two manufacturing centres. The first at Shanghai in 1994 and the second at Guangzhou in 1995. This brings the direct supply of custom length LYSAGHT® products to the growth centres of northern and southern China. With a network of sales and technical offices throughout the country, BHP Steel Building Products are geared to service your needs. We have already supplied more than 9 million m² of cladding and structural decking products to over 9 hundred major projects in China. Now with ISO 9002 accreditation, we can now prove that we do it even better. The LYSAGHT® products manufactured in China are produced to the same standards as BHP Steel Building Products use elsewhere throughout the world. They are ALWAYS manufactured from BHP's reliable coated steels, such as CLEAN COLORBOND®, ZINCALUME® and ZINC HI-TEN® steels, depending on your application and choice.

We look forward to providing the best solution for you.

BHP Building Products

本色镀锌钢板 UNPAINTED ZINCALUME® STEEL

我们生产的来实钢品均采用享誉世界的BHP涂覆钢板为原料。当客户不需要使用彩色面板时，可采用本色镀锌钢板（Zincalume®）。

镀锌钢板是BHP公司的一项国际专利产品，该产品自七十年代向世界市场推广以来，已成为最受欢迎的屋、墙面用钢板。镀锌钢板的热浸合金镀层含55%铝、43.5%锌和1.5%硅，有效地结合了钢板的强度、铝的抗腐能力及锌对切口及间隙的牺牲保护能力之优势。

在相似环境下，同等镀层厚度的镀锌钢板的寿命是镀锌钢板的四倍左右。镀锌钢板是一种价格性能比优越的产品，其成本远远低于不锈钢板或铝板，并具有令人赏心悦目的浅银灰色亮丽外表。

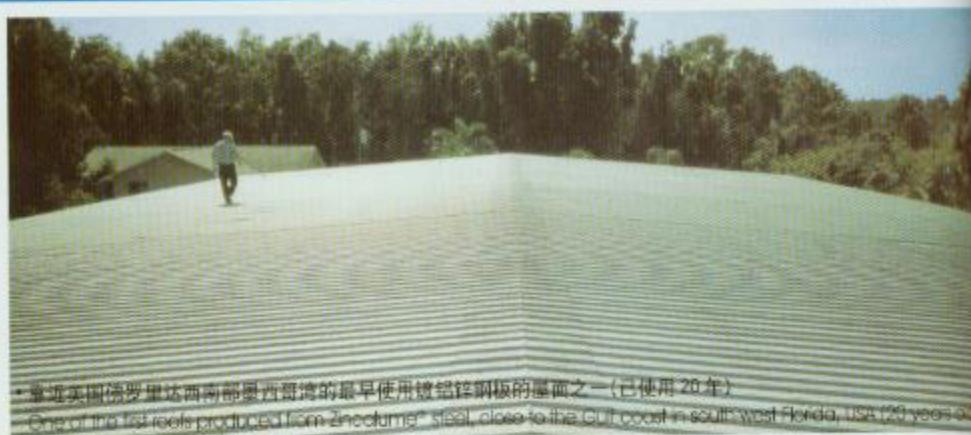

照片显示了镀锌钢板同镀锌钢板比较时表现的高耐腐蚀性，以及镀锌钢板比较时，镀锌合金层中的锌含量对切口及刮痕处的牺牲保护能力。镀锌钢板符合澳大利亚AS1397标准，来实钢品采用的本色镀锌钢板为AZ150（双面镀锌量不小于150g/m²）。

All of our LYSAGHT® profiles are produced from BHP's world class coated steels. When the cladding application is not required to be coloured, the steel used is Zincalume® steel.

Zincalume® is an international patent owned by BHP. It has become the most popular steel for the manufacture of exposed roof and wall cladding, since it was released into the world market, commercially, in the 1970s. Zincalume® steel combines the strength of steel with the corrosion resistance of aluminium and the sacrificial protection of zinc via its hot dip coated alloy coating of 55% aluminium, 43.5% zinc and 1.5% silicon.

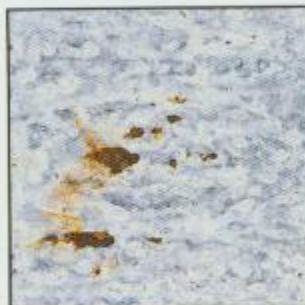

Zincalume® steel offers a service life of 4 times that of galvanised (zinc coated) steel of the same coating thickness exposed in similar environments. It is a 'value for money' product, having a much lower cost to that of stainless steel or aluminium. Zincalume® has a pleasing silver/light grey appearance.

Photographs graphically illustrate the superiority of Zincalume® steel when compared to galvanised (zinc coated) steel. The sacrificial zinc content of the 55% al/zn coating gives cut edge and scratch protection when compared to aluminium coated steels. Zincalume® steel is produced to comply with Australian Standard AS1397. The coating mass used on our Zincalume® LYSAGHT® profiles is AZ150 (150g/m² minimum).

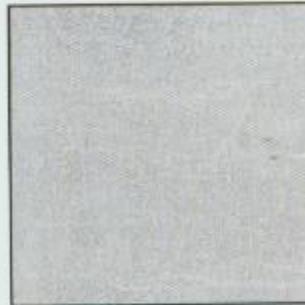

靠近美国佛罗里达西南部墨西哥湾的最早使用镀锌钢板的屋面之一（已使用20年）

• 秦皇島华森邦道钢管厂 - 靠近海边。采用彩色镀锌钢板的来实屋、墙面板使用 13 年后仍处良好状态
Huayuan Bundy Tubing - After 13 years by sea, LYSAGHT® profiles produced from Colorbond® steel after 13 years are still in good condition.

• 桂林甲山饭店 - 采用彩色镀锌钢板的来实屋、墙面板使用 18 年后仍处完好状态
Gulin Jishan Hotel - LYSAGHT® profiles produced from Colorbond® steel after 18 years are still in excellent condition.

随着预涂覆钢板的发展，BHP 不断推陈出新，成为世界涂覆产品先进技术的领先者。来实钢品始终采用BHP最先进的彩色镀锌钢板作原材料，为客户提供最好的成型产品。

洁面彩色镀锌钢板(Clean Colorbond®)最近取代了原先的标准级彩色镀锌钢板而成为我们的常规预涂覆产品。它以镀锌钢板为基材，加之独特的烤漆配方，经过严格的户外暴露试验后投放市场，不仅保留了标准级彩色镀锌钢板所具有的色彩持久、抗涂层龟裂、剥落的优点，同时具有防止灰尘在建筑物表面吸附的特色，而建筑物上灰尘吸附的现象在中国是相当普遍的。

我们常备有六种标准颜色的洁面彩色镀锌钢板，对有充足供货期的大型项目，我们可提供更多的非标准颜色供客户选择。

洁面彩色镀锌钢板还有珠光漆级、XPD 级(特殊耐久的氟碳漆涂覆系统)以及 XSE 级(用于恶劣环境)等多种彩色涂覆系统供选择。

BHP 彩色镀锌钢板符合澳大利亚 AS2728 标准。

Since the evolution of pre-painted steels, BHP has emerged as a world leader in the painting of metallic coated steels. Consequently BHP's Clean Colorbond® steel is always used in the production of our LYSAGHT® profiles. The colours of Clean Colorbond® steel are applied over a Zincalume® steel base, ensuring an even longer service life than unpainted Zincalume® steel. No colours of Clean Colorbond® steel are released to the market until they have undergone and passed extensive outdoor exposure in extreme conditions.

Clean Colorbond® steel has recently replaced Colorbond® XRW steel as our standard pre-painted product. The new paint formulation was designed to overcome dirt staining and retention, so common in China on all building surfaces. Clean Colorbond® steel retains the high colour retention, lack of cracking, peeling and flaking of the Colorbond® XRW it replaces. Now, in addition to warranties for service life to perforation and colour fade, we can offer a warranty against dirt retention on our LYSAGHT® profiles.

At BHP Steel Building Products we hold stocks of Clean Colorbond® steel, in 6 designer colours. For large projects with adequate lead time we can supply from an additional colour range.

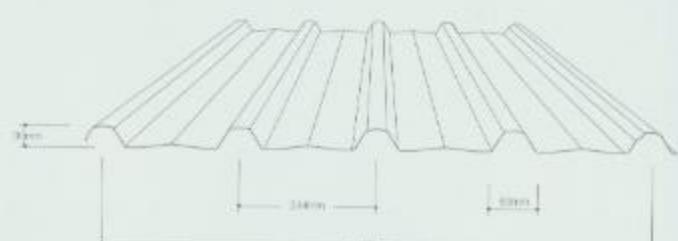

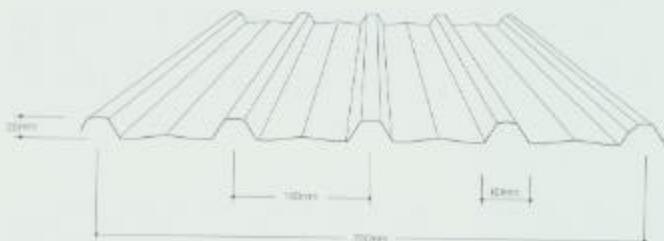

The CLEAN formulation is now also available on the Pearlescent, Colorbond® XPD (a premium durability PVF₂ paint system) and Colorbond® XSE (for severe environments) steels, on request.

BHP's Colorbond® steel conforms to Australian Standard AS2728.

关于 BHP 锌铝彩色压型
钢板的使用评估

根据对锌铝彩色压型钢板的广泛研究，该产品在许多方面表现出色。然而，对于某些应用来说，其性能可能不如其他产品。因此，建议在使用前进行评估，以确保其适合您的需求。

在中国，我们生产两种不同覆盖宽度的来实TD板。广州工厂生产的板型覆盖宽度为760mm(钢板标准总厚度为0.47mm)，上海工厂生产的板型覆盖宽度为975mm(钢板标准总厚度为0.53mm)。两种板型均具有宽槽、低肋及板跨适中的特点，是理想的屋面、墙面压型钢板。

来实TD板的材质符合澳大利亚AS1397-G550-AZ150标准，采用最小屈服强度为550MPa的高强度钢滚压而成，这样增大了钢板的跨度，减少了支撑材料的使用，从而降低了屋面系统的成本。

独特的公母肋设计杜绝了雨水的毛细渗入，极佳的密水性使来实TD板在暴风雨地区亦被广泛使用。

在满足运输条件的情况下，来实TD板的长度一般可以根据项目需求生产。

In China, we produce 2 versions of LYSAGHT TRIMDEK®, with different cover widths: 760 mm, ex our Guangzhou factory (0.47mm total coated thickness is the normal thickness). And 975mm, ex our Shanghai factory (0.53mm total coated thickness is the normal thickness). Both profiles feature bold ribs with architecturally pleasing wide pans and are ideal for both, roofing and walling applications.

All LYSAGHT® roofing and walling profiles are produced from 550MPa minimum yield strength high tensile steel to Australian Standard AS1397-G550-AZ150. This allows for a large spanning ability product, thus reducing the frequency of supports, providing a very cost effective roofing system.

The overlapping side ribs are designed to prevent the capillary entry of water and the profile has been fully tested around the world in the highest of rainfall intensity areas.

LYSAGHT TRIMDEK® is produced to our customers' required project lengths, restricted only by transport limitations.

安装 INSTALLATION

来实TD板以螺钉穿透方式固定，用于屋面时采用波峰固定，作墙板时通常采用波谷方式固定。固定螺钉对屋面至关重要，BHP通常配套供应与压型钢板具有同等使用寿命及密水性极佳的螺钉，使其与来实钢品共同组成密水耐久的屋面体系。

我们还提供与压型板配套的用BHP洁面彩色镀铝锌钢板和镀铝锌高强钢板等滚压而成的泛水、收边板及其他零配件。

来实TD板的最小建议屋面坡度为 3° (1/20或5%)。

LYSAGHT TRIMDEK® is installed using self-drilling fasteners at the crest of the ribs for roofing and in the valleys for walling. Fasteners are a critical part of roofing and therefore, it is very important to use only compatible and approved fasteners that have been coated to give the equivalent service life of the LYSAGHT® profile. These are available as part of your cladding package from BHP Steel Building Products.

The same compatibility requirements apply to flashings, trims and other accessories. A full range of purpose made flashings and trims produced from BHP CLEAN COLORBOND® and ZINCALUME® steels, also form part of our cladding package.

The recommended minimum roof pitch for LYSAGHT TRIMDEK® is 3° (1 in 20 or 5%).

• 新加坡展览馆 Expo Gateway, Singapore

• 北京首都国际机场候机楼 Capital International Airport Terminal, Beijing

双层板系统 DOUBLE SKIN SYSTEMS

来实TD板作工业建筑的内层板使用亦非常理想。由于室内风载小，受环境腐蚀少，因此我们采用更薄的BHP白色或本色镀铝锌钢板生产来实TD内层钢板。通常内层板安装在檩条的室内一侧。

LYSAGHT TRIMDEK® is an ideal cladding for the internal lining of industrial buildings. We stock thinner BHP coils in white colour, for the production of LYSAGHT TRIMDEK®, for this purpose. Generally this is installed to the internal face of the purlins and girts.

曲面板 CRIMP CURVING

来实TD板可预制成正弧和反弧板，以满足建筑效果的需要，其最小弯曲半径为500mm。

请参见本页的部分来实TD曲面板的工程实例照片。

LYSAGHT TRIMDEK® is also available in pre-curved sheets for architectural features. Both convex and concave curved sheets are available. The radius is as nominated by you, down to a minimum of 500mm.

Some good examples of LYSAGHT CRIMP-CURVED TRIMDEK® are shown on the accompanying pages.
